EARTHWORKS
ANNUAL REPORT
2010
Earthworks is a nonprofit organization dedicated to protecting communities and the environment from the impacts of irresponsible mineral and energy development while seeking sustainable solutions.

Founded in 1988, we fulfill our mission by working with communities and grassroots groups to reform government policies, improve corporate practices and influence investment decisions. We expose the health, environmental, economic and social impacts of irresponsible digging and drilling through work informed by sound science.

Introducing Earthworks’ New Executive Director, Jennifer Krill

Extracting social and environmental justice from corporate boardrooms since 1995, Jennifer Krill joined Earthworks as our new Executive Director in January 2010. In her first year at Earthworks, Jennifer has traveled to most of our field offices, visited with our members living amidst the oil and gas industry, toured open-pit mines in the west, and developed new partnerships for Earthworks among allies and supporters. Jennifer splits her time between Earthworks’ headquarters in Washington, D.C. and our field office in Berkeley, California, where she lives with her husband.

Prior to Earthworks, Jennifer directed campaigns at Rainforest Action Network (RAN). She is a co-founder and currently serves as secretary of the board of directors of Plug In America and holds a B.A. and a B.L.A. from Ball State University. Whenever she can, Jennifer escapes into the Sierra Nevada Mountains for skiing, paddling, and wilderness backpacking.

Staff

Jennifer Krill  Executive Director
Bruce Baizel  Senior Staff Attorney
Morey Burnham  Program Associate
Scott Cardiff  International Campaign Coordinator
Cathy Carlson  Senior Policy Advisor
Ann Corbett  Development Director
Bonnie Gestring  Northwest Circuit Rider
Jennifer Goldman  Public Health & Toxics Campaign Director

Gwen Lachelt  Oil & Gas Accountability Project Director
Lorraine Osinski  Finance and Administrative Manager
Lauren Pagel  Policy Director
Payal Sampat  International Campaign Director
Alan Septoff  Research & Information Systems Director
Nadia Steinzor  Marcellus Shale Regional Organizer
Lashonda Thigpen  Administrative Associate
Sharon Wilson  Texas and Gulf Regional Organizer

Board of Directors

Kerry K. Anderson  Co-chair
Michael E. Conroy, Ph.D.  Co-chair
Gloria Flora
Jay Halfon, Esq.  Secretary/Treasurer

Bill McNeill, D.D.S.
Glenn Miller, Ph.D.
Karin Sheldon, J.D.
Wilma Subra

Reducing Poisonous Mercury from Gold Mines
For the first time, the federal government announced regulations that require the gold mining industry to meet nationwide air emission limits for mercury, reducing emissions by 77% from 2007 levels. Earthworks’ “Get out the Mercury” campaign helped expose the problem and strengthen the new rules, protecting our nation’s waterways and children’s health. With new federal rules in place, the whole country will benefit from cleaner air and water.

Ensuring Accountability in New Energy Regions
Earthworks expanded our Oil & Gas Accountability Project (OGAP) into the Northeast and Texas.
- In Pennsylvania and other parts of the Marcellus Shale region, we held “know your rights” workshops for landowners and residents and advanced policies to protect health, air and water quality. We also worked with allies to launch CleanWaterNotDirtyDrilling.org to bring New Yorkers together to promote policy reform.
- In Texas, we introduced Drill-Right Texas, a platform to reform oil and gas practices and policies. We conducted air quality tests and health surveys in the town of Dish, resulting in Texas regulators implementing a mandatory 12-hour response to odor complaints. We also presented case studies of families impacted by drilling operations to the EPA.

National People’s Oil & Gas Summit
The 7th National People’s Oil & Gas Summit was held in Pittsburgh, Pennsylvania, our first summit in the Eastern United States. It brought together more than 250 people from 26 states and 3 foreign countries and built bridges between experienced communities in the Western U.S. and those in the Northeast who are facing oil and gas exploration for the first time.

Promoting Responsible Gold Sourcing
The No Dirty Gold Campaign has signed 70 jewelry retailers onto the Golden Rules for more responsible mining, and released two reports to improve standards for gold sourcing. The Quest for Responsible Small-Scale Gold Mining focused on efforts for certification of small-scale gold mining, while Tarnished Gold? assessed the jewelry industry’s progress towards responsible sourcing. Earthworks supported the Dodd-Frank Wall Street Reform and Consumer Protection Act, which requires companies to report whether they source minerals from the Democratic Republic of Congo and if they are conflict-free.

Exposing the Dirtiest Energy Source
Earthworks exposed Canadian tar sands oil as the dirtiest oil source and a threat to a renewable energy economy in a groundbreaking report, Tar Sands Invasion, co-authored with Corporate Ethics International, Natural Resources Defense Council, and the Sierra Club. In July, our coalition led a march from the Canadian Embassy to the White House to protest the proposed Keystone XL tar sands pipeline and presented the Obama Administration with nearly 100,000 letters opposing its development.

Protecting Ecosystems and Wilderness
- Bristol Bay, Alaska: More than 50 leading U.S. and U.K. jewelers representing more than $5.5 billion in annual sales have signed the Bristol Bay Protection Pledge, vowing not to source gold from the proposed Pebble Mine, located at the headwaters of the world’s largest wild salmon fishery.
- Cabinet Mountains Wilderness, Montana: Earthworks helped challenge the Rock Creek mine permit in federal court by showing that it did not minimize impacts to water quality and fisheries. The court’s decision to toss out the permit protects threatened bull trout and grizzly bears.
- Colville, Washington: Earthworks supported the Colville Indian Environmental Protection Alliance in banning large-scale mining on the Colville Reservation, protecting fish and wildlife habitat along the Columbia River.
- Costa Rica: We supported local organizations that succeeded in permanently protecting tropical forests and the San Juan River from the proposed Crucitas open-pit gold mine.
Major Donors and Foundations

Earthworks gratefully acknowledges the generous support and critical contributions of our members and e-activists. Thank you so much!
