

It's time to clean up.

The Oil & Gas Industry has buried up to 100,000 pits on well sites in New Mexico. The Oil Conservation Division (OCD) has documented nearly **7,000** incidents of contamination to our soil and water from pits. Today, **49,000** active wells exist, most with associated pits. Each year, the industry creates hundreds of new toxic pits.

It's Time to Clean Up.
It's time to require industry to prevent pollution and clean up after themselves.

Where: Santa Fe, NM; Porter Hall, 1220 S. St. Francis Drive

When: November 5th at 9 a.m.

Attend the Oil Conservation Commission hearing starting November 5, and support the proposed rule to:

- Require closed loop systems instead of oil and gas pits near our water resources, homes and schools
- Prohibit unlined oil and gas pits entirely

Demand that the oil & gas industry CLEAN UP by hauling toxic pit waste to approved facilities. End "on-site burial" in New Mexico.

**Industry can afford to
Do It Right.**
