

Texas Oil & Gas Accountability Project

Public Meeting for Barnett Shale Citizens

Help Fix TCEQ's 12-hour Odor Response System

October 13, 2010
7:00 PM

DISH, Texas Town Hall
5413 Tim Donald Road
DISH, Texas 76247

With:

- Wilma Subra
 - TCEQ or their empty chair
 - EPA
 - Sharon Wilson
-
- Have you made an odor complaint to TCEQ and been unhappy with the outcome?
 - Interested in learning more about TCEQ's Odor Complaint System?
 - What to make the System better serve the "Citizens of the Shale"?

Audiovisual equipment will be available for your use

Eight months later, the Texas Oil & Gas Accountability Project wants to check in with TCEQ -- and the people affected -- to show them how effective this new 12-hour odor response policy is.

Based on public documents, we know that **98% of the time, when you call in with an odor complaint, TCEQ finds no violation**, even when 40% of the time you tell them the odors are making you sick with ailments ranging from headaches, vomiting and burning eyes to heart palpitations, dizziness and breathing difficulties.

At Texas OGAP, we don't think that's good enough! In fact, we think it stinks! The 12-hour odor response is broken and we want TCEQ to fix it so it is more protective of public health.
