

## Mine proposals that include submarine tailings disposal (STD)

Updated March 2023

Estimated tonnes of tailings and waste rock that would be dumped annually into the ocean from *proposed* mines.

| Mine<br>(linked to data source) | Location         | Company  | Stage of Development   | Tailings and Waste Rock (tonnes) | Proposed dumping depths |
|---------------------------------|------------------|--|--|----------------------------------|-------------------------|
| <a href="#">Nussir</a>          | Norway           | Nussir ASA   | Fully permitted, pending project financing   | 2 million                        | 90 meters               |
| <a href="#">Engebø</a>          | Norway           | Nordic Mining ASA<br>ISIN: NO0010317340  | Pending waste management plan, final environmental requirements, and project financing | 4 million                        | 300 meters              |
| <a href="#">Wafi-Golpu</a>      | Papua New Guinea | Newcrest Mining<br>ISIN: AU000000NCM7<br>Harmony Gold Mining Company Limited<br>ISIN: ZAE000015228 | Environmental permit issued  | 13 million                       | 200 meters              |
| <a href="#">Yandera</a>         | Papua New Guinea | Era Resources<br>ISIN: AU000000ERA9  | Exploration drilling   | TBD                              | TBD                     |
| <a href="#">Woodlark</a>        | Papua New Guinea | Geopacific Resources Limited<br>ISIN: AU000000GPR2   | Development activities suspended   | 12 million                       | Unknown*                |

\*[Geopacific Resources Limited](#) consolidated its ownership of the Woodlark project in [June 2019 when it acquired Kula Gold](#). Despite [multiple requests in 2015 from the Mineral Policy Institute](#) and others, Kula Gold never released the project's Environmental Impact Statement.
